About the Company:

W, Inc. (4W Technologies) was established in 1996 by seasoned IT professionals and is headquartered in Garfield, New Jersey (USA) with additional offices in Chennai (India). Over the years, thanks to our customer's success, we have grown from just a few employees to over sixty at present. We firmly believe that we can only succeed if our customers succeed and therefore dedicate ourselves to our customer's success.

We specialize in **Healthcare, E-commerce, Financial Services, Government, Insurance** as well as **Retail & Wholesale**, just to name a few verticals, by utilizing the latest Intersystems and related technologies. We take great pride in our work and have the ability to perform both project or hourly based work within strict budgetary constraints by utilizing the latest available technologies and best-of-breed solutions to maximize the benefits for our customers. We have a proven track record of more than 18 years and senior staff with decades of combined experience providing innovative solutions to companies such as IBM, Horizon Blue Cross Blue Shield, Health Partners, Franklin Templeton, Quest Diagnostics and many other clients.

Responsibilities:

1. Software Developer at 4W holds a crucial role in timely fulfillment of internal and world-wide client's software needs and in ensuring on-going business satisfaction. Hence, you become part of a team and understand the flow of support projects; create, modify, resolve technical issues and develop software based on requirements.
2. You will enter a path of agile learning and contribute your very potential along with skilled team members for the progress and advancement of the company and its needs.

3. You will not be let alone during the process of your continuous learning as you will be guided by proficient team leaders and colleagues. And, besides your client meetings, you will have individual review meetings as an important part of your learning process.
4. Your willingness to learn different programming languages.
5. Your readiness to work with both legacy and cutting-edge systems in programming and technology.
6. Your passion to take part in every stage of Software Development Life Cycle.
7. Your ability to balance a variety of technical needs and priorities.
8. Your interest to work with clients across the globe.
9. And your attitude to provide technological leadership that fosters collaboration and innovation.
10. Preferable programming requirements: Java, Python
